

- - **Root level** → applies to the whole repo.
 - **Inside a folder** → applies only to that folder.

Pattern	Meaning
<code>file.txt</code>	Ignore <code>file.txt</code> in the root folder
<code>*.log</code>	Ignore all <code>.log</code> files anywhere
<code>/file.txt</code>	Ignore only <code>file.txt</code> in the root folder
<code>folder/</code>	Ignore everything in <code>folder</code>
<code>**/logs/</code>	Ignore all <code>logs</code> folders anywhere
<code>!important.txt</code>	Do not ignore <code>important.txt</code> (even if ignored before)
<code>*.tmp</code>	Ignore all <code>.tmp</code> files
<code>**/*.tmp</code>	Ignore <code>.tmp</code> files in all subfolders
<code>*.env</code>	Ignore <code>.env</code> files anywhere
<code>*~</code>	Ignore backup files ending with <code>~</code>
<code>.DS_Store</code>	Ignore Mac OS metadata files
<code>Thumbs.db</code>	Ignore Windows thumbnail cache
<code>[abc]*.txt</code>	Ignore <code>.txt</code> files starting with a, b, or c
